Education

Carnegie Mellon University Pittsburgh, Pennsylvania — Sep 2022 ▸ Dec 2023
Master of Science in Computer Science; GPA: 3.75/4.0 — *School of Computer Science*
Courses: Algorithm Design and Analysis, Computer Systems, Database System, Web Application Development, Enterprise Web Development, API Design, Introduction to Cryptography, Machine Learning, Virtual Reality and Augmented Reality

New York University New York, New York — Sep 2019 ▸ Jun 2022
Bachelor of Arts in Computer Science; GPA: 3.85/4.0 — *College of Arts and Science*
Minor in Mathematics, Game Design, Web Programming and Applications
Courses: Operating Systems, Parallel Computing, Interactive Computing, Computer Graphics, Predictive Analytics, Web Dev

Work Experience

Octavate New York, New York — May 2023 ▸ Aug 2023
Software Engineer Intern

- Researched, installed, and trained a cutting-edge AI art generative model from scratch, achieving reliable results in generating a substantial volume of realistic and aesthetically pleasing images;
- Conducted large-scale data scraping on 1 million copyright-free images from up to 20 distinct internet sources using Selenium.js, BeautifulSoup, and Unsplash Image API;

Highlights: driving project success by effectively allocating computational resources on Google Cloud Platform, while ensuring that project goals are achieved within scope, budget, and time constraints.

TensorHealth Shanghai, China — Jul 2022 ▸ Sep 2022
Front-End Development Intern

- Designed and implemented an AR experience utilizing TensorFlow.js to facilitate muscle pain recovery;
- Collaborated to build TensorHealth WeChat mini program providing assistance to hundreds of individuals afflicted with myalgia, streamlining treatment assignment and patient feedback;

Highlights: integrating state-of-the-art technologies and innovative design principles to enhance user engagement and accessibility, significantly contributing to the project's success in providing tech-driven healthcare solutions.

NYU CREATE New York, New York — Jun 2021 ▸ May 2022
Web Design and Web Development Intern

- Developed customized applications for a variety of research projects including Cogsci DIY;
- Engineered a web-based Virtual Reality calibration room using A-frame VR, significantly enhanced technology-assisted learning experiences by providing immersive and interactive environments;

Highlights: leading a team of three in the development of the NYU DREAM Website, a sophisticated React single-page application catering over 42,000 students and researchers worldwide.

Skills

Programming Language	Web Development	Open Library	Software	Language
Python	React	P5.js	Unity	English
JavaScript	Django	D3.js	GameMaker	Chinese
TypeSript	Restful API	Node.js	LaTeX	Cantonese
C++	GraphQL	TensorFlow	FIGMA	Japanese
Java	MySQL	OpenAI API	PixelMash	

Beginner Proficiency / Proficient / Built Substantial Projects / Built and Shipped Sophisticated Products
